### Recycling of Outdated CD-Rom Discs

April 2006

1. **BACKGROUND.** Reference Memorandum, 11 February 1993, subject: Destruction of CD ROMs - Interim Guidance, from the Office of the Assistant Secretary of Defense. The referenced memorandum was provided to Mr. Whitman by the National Security Agency (NSA). The guidance provided by NSA recommended storing CD-ROMs, rather than "burning, shredding, or pulverizing . . . pending development of final disposition instructions."

2. Burning, shredding or pulverizing of *non-classified* CD-ROMs by end- users is not recommended by USACHPPM, and is unnecessary for the type data that is normally used within MEDCOM. CD-ROM discs such as the MIDI, HMIS, ARMYLOG, and FEDLOG discs do not require extensive destruction. Discs that are outdated or no longer needed may be rendered unreadable by cutting in half or deep scratching the data side (the shiny side without the label) with a nail, screwdriver, or similar tool. Two deep radial scratches extending from the small inner hole to the outer edge are sufficient to prevent unauthorized access to the data. These discs may be placed in the general waste stream for disposal.

3. Recycling of outdated CD-ROM discs is acceptable as long as the discs have been rendered unreadable. Most recyclers will accept both the CD and the jewel case but require them to be separated when shipped. Check with the recycler for their current policies.
